

Fantastic Career Opportunity to Become a Home Early Educator

- You enjoy being with children, helping them learn and develop?
- You are happy to use your home to create a nurturing, safe place for children to thrive?
- Would love to have a childcare business at home with the full support of experts to help you set up and grow?

Futura Learning Partnership is working in partnership with Orange Moon to recruit home early educators to provide much needed childcare to local parents.

Orange Moon are an award-winning Ofsted registered childminder agency, operating as a quality assured network for professional home early educators. They provide start-up support to register, a personal mentor and on-going training, personal mentor to support once registered. There is also a £1200 government start-up grant that can be claimed once registered.

Home early years educators are highly skilled professionals who provide care and learning for other people's children in their own homes. It is an important and rewarding role; you will be shaping the lives of young children, whilst organising fun learning.

We are looking for self-motivated parents, and other people living in the local communities around Futura's schools, who would like to set up their own home-based childcare business near our schools. If you are passionate about helping young children to reach their full potential, having your own home early education business could be a career for you.

Once you are registered you will have the opportunity to be partnered with a Futura Learning Partnership school. This means you will have opportunities to work with members of the school teaching team, use the school facilities and join school community events.

INTERESTED?

You will be hearing more about this exciting project throughout this term so look out for messages via emails and Twitter in the coming weeks. There will be some online webinars for you to get more information.

In the meantime, to express interest, please click the Learn More link below and complete the enquiry form on the web page.
